

Protected Areas and Oil Concessions: Namibia

Total estimated potential crude oil reserves: **11 Billion Barrels**
Total estimated potential emissions from oil reserves: **4.73 Billion Tons CO2**
Estimated accessible crude oil under protected areas: **207 Million Barrels**
Estimated emissions from oil under protected areas: **89 Million Tons CO2**

The offshore Orange River Basin holds much of the country's oil.

Testing has begun in the sensitive Kavango Basin.

Namibia's only production wells are in Kudu Field.
